

## READING PUBLIC SCHOOLS

Administration Offices

Harry K. Harutunian, Ph.D.  
Superintendent

82 Oakland Road  
Post Office Box 180  
Reading, Massachusetts 01867

Dennis A. Richards  
Associate Superintendent

Tel. 781-944-5800 • Fax 781-942-9149

TO: Reading School Committee  
FROM: Dr. Harry K. Harutunian  
DATE: August 27, 1998  
TOPIC: Network Installations

Please find attached a memorandum from John Marion, Director of Technology, giving me an update on the status of the local area networks being installed at Joshua Eaton, Birch Meadow and Reading High School. We are very excited that early in the fall all three schools will have local area networks up and working giving our teachers and students Internet access throughout the buildings.

If you have any questions, please contact me.

To: Dr. Harry Harutunian  
From: John Marion  
Re: Network Installation Progress  
Date: August 27, 1998

Per your request this is a status report of the progress to date of the network installation.

The completion of technology installation can be best described as a three phase process. The first phase is the hard wiring of the building that brings technology access to each classroom and office. The second phase is the installation of a file/proxy server necessary to channel/filter information going to each end user. The last phase is to configure each PC with a network card, memory, and network/internet software. Each school in this process is in a different phase.

The Eaton School is near completion. The wiring is completed throughout the building. The computer lab will have a hub and wiring to each workstation completed by the end of next week. All testing of the connections is successfully completed. The file server is installed and is currently being configured. All the PC's have memory upgrades and network software installed. The installation will be completed by August 28.

The Birch Meadow School wiring phase is nearly completed. Connections are currently being tested. A file server will be installed and each PC will have a memory upgrade completed and configured by September 4.

The Reading Memorial High School is currently being wired. The anticipated completion date of wiring is October 9. The servers and configuration work will be installed during this timeframe. Memory upgrade and network/internet software are currently under review and will be functional by the wiring completion date.

Overall there is great progress being made toward completion of this massive technology project. I will submit additional reports to you as progress is made and completed projects are realized.

# Schools review contractor bids for Internet wiring of buildings

BY NADINE WANDZILAK  
ADVOCATE CORRESPONDENT

Imagine third graders in Reading classrooms working together on a weather project. They communicate between classrooms, schools and beyond town boundaries, maybe even internationally, via the Internet.

All seven of Reading public schools will be wired in local area network by 2001 in a system that ultimately will connect them and seven town buildings: the library, Town Hall, senior center, police and fire stations and Department of Public Works.

Perhaps beginning this month, the Birch Meadow, Joshua Eaton, Killam and Reading Memorial High schools will each be wired for individual computer networks that will carry voice, data and video. That work should be completed by fall, said School Superintendent Harry Harutunian.

Killam now has a small network and Internet access through MediaOne; Coolidge Middle School has a modified network; and Parker Middle School has had a building-wide network and high speed Internet access since the building was renovated in 1996, Harutunian said. Network wiring will be part of renovations at Barrows and Killam, he said.

Why wire school rooms, then link schools together? One reason, Harutunian said, is the information available at students' fingertips. With several keystrokes, Harutunian brought up the Web pages of the Library of Congress, then randomly-selected the pages of schools in Appleton, Colorado and Japan.

A second reason is continuity between schools and between home and school. Based on a school department survey, 90 per-

cent of students at Reading High have access to a computer at home. The schools want to mirror what students have at home and use computers as teaching tools, Harutunian said.

As a teaching tool, Harutunian said students receive "immediate gratification" from the computer and image projector in each class-

Last year, Town Meeting appropriated \$500,000 technology upgrades and expansion in an effort to equalize the technology among town schools, Harutunian said.

The school department received two bids last month on the network wiring to be done in the Birch Meadow, Eaton, Killam and Reading Memorial High Schools. The school department is reviewing the bids, Harutunian said. He avoided releasing the names of the bidders and the bids until a contract is signed, which could happen within the next week to 10 days.

The school department also received a \$120,000 state technology grant for network hardware and wiring. The grant will be used, Harutunian said, for wiring either at Killam or, if needed, for the remaining network projects.

Yet another factor in the wiring equation is MediaOne, which provides high-speed Internet access. Since January, 1998, MediaOne has provided free Internet access to the schools, one year after making it available to residences, Harutunian said.

Once the entire network is installed, Harutunian said the Internet will become a vital communication tool between schools, students and parents.

*'My responsibility is that children get the opportunity and exposure to be competitive in school and in the work force.'*

room. Suppose a student had a writing assignment, Harutunian proposed. Instead of having the work photocopied, put on a transparency and edited, a student could bring in a disk with his essay on it. Or, once the school has Internet access, use e-mail.

From the classroom computer, the story appears on a large screen visible to the whole class. Using a laser pointer, the teacher makes editing suggestions, and the class joins in the discussion. Before the period is over, Harutunian concludes, the student has a corrected document in hand.

A third reason, he said, is the economy that comes from sharing resources.

"My responsibility is that children get the opportunity and exposure to be competitive in school and in the work force," Harutunian said.

## Letter to the Editor

Dear Editor:

The Reading School District is pleased to announce that their five-year technology plan has been approved by the Commonwealth of Massachusetts. What this means for Reading is that we are now eligible to apply for technology money at the rate of \$30 per student. That amounts to more than \$120,000 for the district.

The state has required school districts to use this money to provide the wiring infrastructure to network the district's seven schools. Here in Reading, this means that along with capital improvement funds, a local area network (providing the wiring that links computers within a building) can be installed in each of the schools and we can move toward implementation of a wide area network (providing the wiring that links computers from building to building) to connect school buildings together.

In designing the technology plan, the state provided stringent guidelines for each school district to follow. The purpose of this was to standardize district plans providing continuity and ease in reading the plans. The technology plan consists of six major areas.

First, each district provided a community and demographic overview. This included information about community involvement in the schools, as well as the district's vision and mission statements relative to technology.

the use of technology in the Reading schools will meet the initiatives set forth in the Massachusetts Education Reform.

In designing the technology plan looks at software needs and priorities for three areas: curriculum and instruction, administration and management, as well as communications and information access. The technology design also articulates the hardware needs and network designs for each school in the district, outlining wiring standards and implementation techniques. Section five also looks at district needs surrounding technology. This involves budgetary and staffing needs as well as staff development plans. This section develops an action plan for the implementation of technology.

The last section of the technology plan outlines the means in which the district will monitor, evaluate, and revise the plan.

Developing this comprehensive plan comprised months of work and input from people throughout the district and community. If you have any questions concerning the Reading School District Technology Plan, please contact Cindy Conti, Director of Technology at 944-5800. Community input is always welcome and I would be glad to discuss any technical and educational implications of the plan. The Reading School District is moving forward in its technological implementation plan with the development of a district-wide

technology committee. If you are interested in participating on this committee, please submit a letter of intent and a

Dear Editor:

Saturday afternoon August 2 when we first smelled the smoke and saw the ash falling we knew that fire was very near. Fed by tinder dry woods and pushed by high winds the fire approached rapidly from the west.

Very quickly Reading firefighters arrived on the scene (along with companies from North Reading, Middleton, Wilmington, Lynnfield, Stoneham and Wakefield). The area from route 93 to County Road where the fire was is difficult to reach. Many feet of hose was run out and the firefighters had to push through brush and trees.

Anxious residents were given reports of the status of the fire quickly and calmly.

Thanks to the prompt and persistent action of the firefighters, the fire was contained and those of us who live near the scene realized how fortunate we are and extend our thanks to all the professionals who saved us from that blaze.

Sincerely,

Edward and Mary Fuller

Reading School Department

mean a better math education for our children and better communication between parents and schools. After hearing the views of all concerned I am confident that the school administration and the school committee clearly have the needs of the children and the quality of their education as their number one priority.

Vicky Schubert  
Birch Meadow Parent

To the Editor:

I was relieved to see the constructive tone of the school committee's hearing on the district's math curriculum. It was encouraging to get a balanced picture of the decision to adopt the Chicago Math program. I agree with those committee members who thanked parents for coming forward to express their concerns. The scrutiny resulting from this discussion will only
