Received

Director Reading Board of Health
16 Lowell Street
Reading, MA 01867

Dear Madam:

Whereas there is no air conditioning in student areas in the new Wood End Elementary School, and ventilation is inadequate, we ask that you take immediate action today to assure that the school is vacated of students should the inside temperature exceed 85 degrees.

* L — We have received several complaints indicating that temperatures last week reached as high as 104-110 degrees have been recorded in student areas on the second floor. Last week District Attorney Martha Coakley shut down the Middlesex District Courthouse when temperatures there were in the 80's because she felt the state's business could not be carried out effectively in those temperatures.

Students with asthma, students and adults taking medications, and expectant teachers are at unnecessary risk under such conditions.

We sincerely hope this urgent condition is not allowed to happen again when it is absolutely unnecessary.

Sincerely,

Gary Phillips, Linda Phillips

Gary and Linda Phillips

Cc: Supt. P. Schettini
Town Mgr. P. Heckenbleikner
